

At the COVAP dairy plant

The Covap dairy plant has very modern technology that enables us to package more than one million litres of milk a day. You are an expert now, you'll surely be able to reconstruct the process of milk at the dairy plant. Cut out the drawings and glue them in order.

1. Milk reception.
2. Cooling.
3. Standardisation of milk and cream.
4. UHT treatment.
5. Homogenization.
6. Packaging.
7. Packing and storage.
8. Shipping.
